

## PROJECT COMMUNICATION PLAN

Project specific objectives	Communication objectives	Activities		Budget	Target groups		Communication tools and channels	Timeplan	Partner role	Evaluation	
What kind of change will the project achieve?	How will the project achieve objectives – by increasing knowledge, raising awareness, influencing attitude, changing behaviour?	What needs to be done to realize project (and communication) objectives?	How will the activities be promoted?	Which expenditure and other resources are needed to achieve project objectives?	Which social groups, organizations and/or individuals are relevant for the project?	What are the main characteristics of target groups; their interests, needs, existing knowledge...?	To which media and which target groups do you plan to disseminate information about the project?	When are the activities planned? When are results of activities expected?	Which partner (or partners) is in charge of an activity and objective?	How will you assess implemented communication measures? Is it necessary to revise the communication plan?	How can you measure reach and eventual deviations of communication measures?
